

Gaslighting (Communism)

Putin giggling with his documented best friend the WESTERN billionaire ruler of Monaco who runs a nation with a casino based economy that operates as an international headquarters for organized crime including the Russian Mafia.

Russia is gaslighting the world. Putin today is calling himself a humanitarian and denying that he invaded Ukraine. There is so much evidence of Putin's war crimes that people have to be insane to not comprehend that mass murder is happening.

Gaslighting is a common well documented tactic of communists. Russia is also claiming bio labs equal bio weapons and ignorant people fall for it. There are literally thousands of bio labs in America and also in Europe. Bio tech is a huge industry.

Russia is literally run by an ex KGB agent trained in psychological warfare like reverse psychology and gaslighting.

What is gaslighting?

Gaslighting is a form of psychological manipulation. Gaslighting happens when an individual or group (such as a political party) puts out information with the intent of sowing seeds of doubt in individuals or the population as a whole, making people doubt themselves and even their own sanity.

The most famous literary form of gaslighting is from George Orwell's *Animal Farm*. In his book, which is overall a warning about communism, Orwell highlights the change in propaganda through the commandments on the barn wall (the collective unconscious). These commandments change subtly over time, the characters start to question their own memory and begin to doubt themselves.
